| This is one of the hardiest Cotoneasters and went through 20 degrees below zero without any harm. It has large berries like cranberries which color up in the middle of August and remain on until very late Fall. It grows rather flat and makes an ideal plant to mix in with foundation plantings and especially with ranch-type houses. We can offer for Fall, 1955 and Spring, 1956, the following: | | |
| 2,000 3 yr. transplants, 15-18", B.R., (field rows) | .85 | .75 |
